High Resolution TRMS System Multimeter

3-349-683-03
2/2.13

- Handheld digital multimeter with TRMS measurement including, amongst other measuring functions:
V AC TRMS, V AC+DC TRMS, V DC,
A AC TRMS, A AC+DC TRMS, A DC
dB, Hz(V), Hz(A), Ω , V \rightarrow +, °C / °F (TC/RTD)
- Resolution of 310,000 digits, triple display, display illumination can be activated under difficult lighting conditions
- 1 kHz / -3 dB low-pass filter can be activated in the alternating voltage measuring ranges
- 1 nA to 10 A direct current measurement, 16 A short-term, current measurement with current clamp transformers and sensors (transformation ratio is accounted for by the display)
- Temperature measurement with Pt100/Pt1000 resistance thermometer
- Broad range capacitance measurement
- TRMS AC and AC + DC, 100 kHz bandwidth
- Measurement data memory for up to 300,000 measured values
- Instrument can be **remote controlled** via IR interface with optional accessory: USB X-TRA (Z216C)
- Instrument can be **remote controlled** via Bluetooth IR interface (M248B variant only)
- Connector jack for external power pack

Applications

Instruments included in the so-called E and high-resolution series are extremely rugged, reliable digital multimeters with housings made of impact resistant ABS. With a resolution of 310,000 digits and roughly 30 different measuring functions, they've been developed for professional use.

Features

RMS Value with Distorted Waveform

The utilized measuring method allows for waveform independent RMS measurement (TRMS AC and AC+DC) for voltage (up to 100 kHz) and current (up to 10 kHz).

Activatable Filter for V AC Measurement

A 1 kHz low-pass filter can be activated if required, for example when measuring motor voltage at electronic frequency converters. The input signal is checked by a voltage comparator for dangerous voltages as long as the low-pass filter is activated. A high-voltage symbol appears at the display if dangerous voltage (> 45 V) is present.

Automatic / Manual Measuring Range Selection

Measured quantities are selected by means of a rotary switch and a function key. The measuring range is automatically matched to the measured values. The measuring range can also be selected and locked manually with a key.

Three Connector Jacks with Automatic Blocking Sockets (ABS) *

All current ranges are implemented via a single connector jack which prevents any possibility of operator error. Auto-ranging is available in all current measuring ranges. Beyond this, the automatic blocking sockets prevent incorrect connection of the measurement cables, as well as selection of the wrong measured quantity. Danger to the user, the instrument and the device under test resulting from operator error is thus ruled out.

* Patented (patent no. DE 10 2005 062 624, US 7,439,725)

Overload Protection

Overload protection safeguards the instrument in all measuring functions for up to 600 V. Voltages of greater than 600 V and currents of greater than 10 or 16 A are indicated acoustically. Dangerous contact voltages are indicated when the 1 kHz low-pass filter has been activated. FUSE appears at the display if the fuse for the current measuring input blows. Switching between high and low impedance measuring functions is disabled in the vent of dangerous contact voltage.

Measurement with Current Clamp Transformers and Sensors

Current clamp transformer and sensors are used for current measurements without interrupting the circuit under test, and for high amperages (> 16 A). The measured current value is automatically calculated and displayed for the user with the help of the adjustable clamp factor.

High Resolution TRMS System Multimeter

Fast Acoustic Continuity Test

Testing for short circuiting and interruption is possible with the selector switch in the Ω position. The threshold value for acoustic signaling can be set to 1, 10, 20 ... 300 Ω in 10 Ω steps.

Automatic Storage of Measured Values *

The DATA function automatically saves the digitally displayed measured value after settling in. Acoustic signaling is also used to indicate whether the new measured value deviates from the initial reference value less or more than 0.1% of the measuring range.

* Patented

Storage of Min-Max Values

Comparable to the slave-pointer function of an analog instrument, the device saves the highest and lowest measured values after the Min-Max function has been activated or reset. These extreme values can be queried at the display.

Memory Mode Operation

The METRAHIT ULTRA is equipped with a quartz-movement synchronized measurement data memory (2048 kB), which has enough capacity for up to 300,000 measured values depending upon configuration. This allows for use of the instrument as an autonomous real-time data logger.

Measurement data recording is executed either:

- Time-controlled with an adjustable storage interval ranging from 0.5 ms (for V/A DC only) to 9 hours
- Dependent upon measured value in the event of exceeded limit/delta value
- Automatically after the measured value settles in
- As an individual measured value by pressing a key

Memory content can be read out from a PC with the help of the USB X-TRA adapter, as well as analyzed and documented with METRAWin 10 evaluation software.

Battery Charging Status – Power Saving Circuit

The battery charging status is indicated by means of four symbols. The device is switched off automatically if the measured value remains unchanged for a period of between 10 and 59 minutes (adjustable), and if none of the controls are activated during this time. Automatic shutdown can be disabled by switching the instrument to continuous operation. The standby mode for the infrared/Bluetooth interface can be deactivated.

Protective Cover for Harsh Conditions

The instrument is protected against damage in the event of impacts or dropping by means of a soft rubber cover with tilt stand and test probe holder. The rubber material also assures that the instrument does not wander if it is set up on a vibrating surface.

Data Interfaces

The device can be remote configured, and momentary and saved measurement data can be read out via the bidirectional infrared interface (M248B: additionally via Bluetooth interface). The USB X-TRA interface adapter is required for the infrared interface, and METRAWin 10 software is required for both interfaces (see accessories). The interface protocol is available upon request.

DAkKS Calibration Certificate

Each multimeter is individually adjusted, subjected to final inspection and calibrated. Adherence to the specification is confirmed by means of the included DAkKS calibration certificate, which is valid worldwide

(recognized by EA and ILAC). After the specified calibration interval has elapsed (recommended interval: 1 to 3 years), the multimeters can be recalibrated at any time in our own DAkKS calibration laboratory.

The USB X-TRA plug-in interface adapter (see accessories) is used for adaptation to the PC's USB port.

Data Interface – Bluetooth (M248B only)

The **METRAHIT ULTRA BT** Bluetooth multimeter variant (M248B) is identical to the **METRAHIT ULTRA** (M248A), except that it is also equipped with a Bluetooth interface.

Wireless data exchange via Bluetooth is an alternative to the optional IR-USB cable connection using the USB X-TRA accessory (Z216C).

The **METRAHIT ULTRA BT** with Bluetooth interface is connected directly to the Bluetooth interface of a Windows PC. However, no communication takes place with peripheral devices such as printers, scanners and the like.

The transmission range is roughly 5 to 8 meters.

Remote control via Bluetooth is identical to corresponding communication via an IR-USB connection.

The only prerequisite for wireless data exchange between the multimeter and the PC is authentication by means of an access code which must be set up at the multimeter and at the PC.

Accessories for Operation at a PC

Interface adapter for USB connection

The following functions can be executed with the USB X-TRA bidirectional interface adapter:

- Configure the **METRAHIT** multimeter from a PC.
- Transmit live measurement data to the PC.
- Read data out of memory at the **METRAHIT** multimeter.

The adapter does not require a separate power supply.

Its baud rate is 38,400 baud.

A CD ROM is included which contains current drivers for Windows operating systems.

METRAwin[®]10/METRAHit[®] software (available as of 2013)

METRAwin[®]10/METRAHit[®]PC software is a multilingual, measurement data logging program for recording, visualizing, evaluating and documenting measured values with reference to time from **METRAHIT** E series multimeters.

Communications between the PC and the measuring instrument(s) is established via available interface adapters.

One or more of the following operating modes are possible, depending on device and interface type (infrared or Bluetooth):

- **Device Configuration**
Remote configuration and querying of device-specific functions and parameters, for example measuring function, measuring range and memory parameters. Frequently used device settings can be saved to configuration files for easy recall.
- **Online Recording of Measurement Data**
Read-in, display and recording of momentarily measured data from the interconnected device
 - Measuring channels up to 10
 - Start recording Manual, triggered by measured value, time triggered
 - Recording mode
 - > Time controlled with sampling interval of 0.05 s* ... 1 s ... 60 min.
 - > manually controlled
 - > measured value controlled in the event of exceeded limit/delta value
 - Recording duration: max. 10 million intervals
- * Depending upon device type, measuring function, number of measuring channels and communication mode (e.g. via modem), sample intervals of less than 1 s cannot be used.
- **Reading Out and Visualizing Stored Data**
If supported by the device: read-in and display of offline data recorded to device memory

For purposes of analysis, data recorded online or read in from the device's memory can be displayed in various formats:

Y(t) Recorder Display for Up to 6 Channels

XY Recorder Display for Up to 4 Channels

Multimeter Display for Up to 4 Channels

Tabular Display for Up to 10 Channels

System Requirements

METRAwin 10 (version 5.3.x) can be run on IBM compatible PCs with Microsoft Windows[®] XP, Vista (32/64 bit) or 7 (32/64 bit).

METRAHIT | ULTRA

High Resolution TRMS System Multimeter

Order Information

Designation	Type	Article number
TRMS Multimeter for direct, alternating and pulsating current measurement (TRMS values), direct and via current clamp transformers and sensors in consideration of transformer ratios, frequency and resistance measurement, continuity test, diode measurement, temperature measurement with type K thermocouples, triple digital display with a resolution of 310,000 digits, measuring categories: 300 V/CAT IV, 600 V/CAT III, including KS17-2 measurement cable set, two mignon batteries, condensed operating instructions, CD ROM, DAkkS calibration certificate	METRAHIT ULTRA	M248A
Same as M248A but with Bluetooth interface	METRAHIT ULTRA BT *	M248B *
Accessories for operation at a PC		
Bidirectional interface adapter, IR-USB	USB X-TRA	Z216C
METRAwin 10 software	METRAwin 10	GTZ3240000R0001
Accessories for Temperature Measurement with Resistance Thermometer		
Pt100 temperature sensor for surface and immersion measurement, -40 to + 600 °C	Z3409	GTZ3409000R0001
Pt1000 temperature sensor for measurement in gases and liquids, -50 ... +220 °C	TF220	Z102A
Pt100 oven sensor, -50 ... +550 °C	TF550	GTZ3408000R0001
Ten adhesive Pt100 temperature sensors, -50 ... +550 °C	TS Chipset	GTZ3406000R0001
Replacement fuse		
Fuses (pack of 10)	FF (UR) 10 A / 1000 V AC/DC	Z109L
Power pack	NA X-TRA	Z218G
Rubber holster and carrying strap	GH X-TRA	Z104C
2 magnetic test probes with touch protection – set with magnetic holder, 5.5 mm measuring contact diameter, insulated, CAT III 1000 V / 4 A, temperature from -10 to 60 °C, holder power under standard conditions with flat head screws: 1200 g perpendicular to the contact surface; measuring instrument connection for multimeter via angled multilam plug	Set 1 – magnetic test probes	Z502U

* As of first quarter 2013

Transport Accessories

HitBag Cordura Belt Pouch

For **METRA HIT** (with/without rubber holster)

HC30 hard case

For two multimeters (with an without rubber holster) and accessories

F836 ever-ready case for multimeter (without rubber holster) and accessories

F829 carrying pouch for multimeters (with and without protective rubber cover) and accessories

Designation	Type	Article number
Imitation leather carrying pouch for METRA HIT and METRAmax	F829	GTZ3301000R0003
Cordura belt pouch for METRA HIT and METRAport series multimeters	HitBag	Z115A
Imitation leather ever-ready case with cable compartment	F836	GTZ3302000R0001
Ever-ready case for 2 METRA HIT s, 2 adapters and accessories	F840	GTZ3302001R0001
Hard case for one METRA HIT and accessories	HC20	Z113A
Hard case for two METRA HIT s and accessories	HC30	Z113A
